

MB-EVCSR2 Water Block (EVGA Classified SR-2 Motherboard)

The MB-EVCSR2 is a single-piece water block designed exclusively for the EVGA Classified SR-2 motherboard. It liquid cools the northbridge and southbridge chipsets, along with nearby components. Blue LEDs are included for optional illumination. Materials include copper with anti-corrosive nickel plating and an acrylic and brass body. G 1/4 BSPP fitting threading.

NOTE: The MB-EVCSR2 is a single piece block and overlaps the CPU socket keep-out areas in some locations. This may cause physical conflicts when using some types of CPU water block brackets. The Koolance [CPU-360](#) is recommended to avoid compatibility issues.

General	
Weight	2.60 lb (1.18 kg)
Wetted Materials	Nickel-Plated Copper, Nickel-Plated Brass, POM Acetal, PMMA Acrylic, Stainless Steel, EPDM
