P/N: TMS-EB200

TMS-EB200 Expansion Board

The TMS-EB200 Expansion Board doubles the amount of components which TMS-200 can monitor and control. Added features include:

- 1 extra 12V DC pump
- 1 extra flow meter (Koolance INS-FM16, INS-FM17/N, or INS-FM18)
- 3 extra fans
- 5 extra temperature sensors (10K Ohm)

The TMS-EB200 Expansion Board will not function without the TMS-200 Main Board. Please see the TMS-200 product page for notes on specific hardware compatibility.

NOTE: If TMS-200 is installed into a motherboard slot, installing the TMS-EB200 Expansion Board will require an additional motherboard slot due to their combined height. Alternatively, both will fit in a 5.25" bay using the tray provided with the TMS-200 Main Board.

Components included: TMS-EB200 expansion board, mounting screws, 5 x temperature sensors, 3 x 3-pin fan wire extensions, 1 x 3-pin pump wire extension.

General	
Weight	1.00 lb (0.45 kg)
