VLX-2000 Refrigeration Liquid Chiller (110VAC /60Hz Only)

Koolance's VLX-2000 is a compressor-refrigerant recirculating liquid chiller rated at 2000W, or 6824 BTU/hr (@25°C liquid & ambient). Chiller control is based on one of four configurable temperature set-points, including the option to lock liquid to ambient for avoiding condensation or to an external K-type thermocouple sensor (not included).

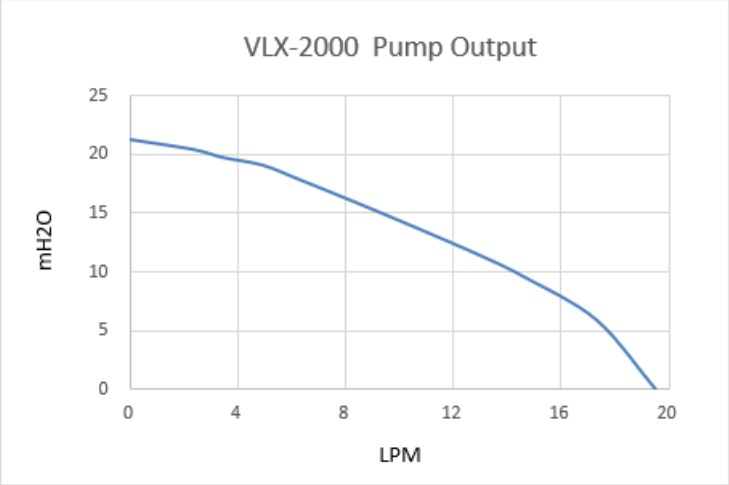

Coolant flow rate, temperature, and reservoir level are monitored, and a USB port allows control and logging of most features using the Koolance System Monitor application. A 0-5V differential voltage output is also provided for industrial process monitoring.

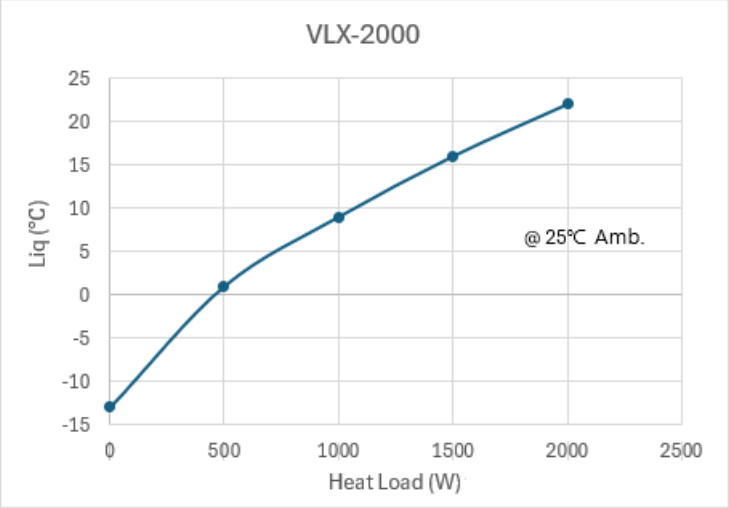

- Cooling capacity: 2000W (6824BTU/hr) @ 25°C liquid/ambient
- Temperature options: liquid set-point, external thermocouple set-point, liquid and ambient delta-T, external thermocouple and ambient delta-T; toggle °C/°F
- Pump: 10 manual levels, up to 19LPM (5 GPM)
- Select only values you want displayed on the front 2-line OLED display (fixed or rotating)
- Show pump impeller speed in RPM
- Show coolant flow rate in LPM/GPM
- Show condenser fan speed in RPM
- Adjust audio alarm and relay trigger (NO or NC) based on: temperature, flow rate, coolant level, pump RPM, and condenser fan RPM
- Refrigerant: R-134a
- Maximum power consumption @ ambient (approximate): 700W @ 35°C
- Designed for an operational temperature range of 0-40°C (ambient and liquid)
- Reservoir capacity: 6 liters
- NPT 3/8in threads on back for fittings
- Includes C13 to NEMA 5-15 power cord

NOTE: Requires 110VAC, 60Hz input power. Keep unit upright at all times, and for at least 24 hours before applying power to ensure sufficient oil reaches the compressor.
