P/N: COV-PMP02P

Pump Fitting Base for PMP-450

COV-PMP02P is a nickle-plated aluminum fitting base for the Koolance PMP-450 pump (sold separately). It allows flow to be specifically directed for increased pump performance, or broader chassis integration.

An extremely flexible design permits inlet and outlet fittings (not included) to both be positioned on top, on the side, or perpendicular to one another (centered fittings are the inlets). Fitting threading is G 1/4 BSPP. Mounting block, bolts, and rubber insulation pad are included.

General	
Weight	1.00 lb (0.45 kg)
Wetted Materials	Nickel-Plated Aluminum, Nickel-Plated Steel, Silicone
