

The CPU-LN2-V2 is Koolance's second generation of CPU evaporator pots for liquid nitrogen and dry ice cooling. Significantly greater performance is gained through a higher base mass and new internal design. These advances help to position the CPU-LN2-V2 among the most effective pots commercially available.

A nickel-plated, solid copper cold plate is combined with an anodized aluminum container. Mounting hardware includes a thick acetal top bracket, steel back plate, back plate insulating pad, and mounting hardware. An elastomeric thermal insulation sleeve is included. The supplied bracket supports the following processor sockets:

- AMD AM2, AM2+, and AM3 processors
- Intel LGA 1156
- Intel LGA 1366
- Intel LGA 775

General	
Weight	3.90 lb (1.77 kg)
Wetted Materials	Nickel-Plated Copper, Aluminum
