

**Radiator/Fans/Shroud, 3x120mm, Aluminum
(Black)**

The EHX-1020 is a dual-pass, triple-120mm fan heat exchanger, rated to about 1000W of heat dissipation. Three fans and a brushed aluminum shroud are included. This is the unit incorporated into Koolance PC4-1000 series systems, but provided separately for 3rd-party chassis integration.

When mounting in the top of a case, the EHX-1020 radiator will usually occupy the top 5.25" bay and *requires 2 inches (51mm) of space above an upper-mounted power supply*. Alternatively, Koolance offers [enclosures](#) to mount this unit externally. 8 mounting screws and metal bushings are included.

NOTE: The EHX-1020 is not sold as a consumer-level product, and does not include instructions on mounting the unit into a chassis. Unless mounted in an external enclosure, it will require permanent modification to the computer

chassis ([stencil available here](#)). Technical support with regard to chassis modification is not provided by Koolance.
