**EHX-1050SL External 1kW Radiator and Fans/Enclosure, Silver**

*ATX computer case not included.*

Missing out on 1000W of liquid cooling because you would like to keep your case? The Koolance EHX-1050 is a triple 120mm **externally** mounted radiator, intended for use with the Koolance 5.25" bay RP-1000 reservoir and pump.

The EHX-1050 features the same dual-pass heat exchanger, brushed aluminum shroud, and fans as the Koolance PC4-1000 1kW series systems. But it also comes with a highly adjustable bracket and lightweight aluminum enclosure for external mounting behind practically any ATX computer chassis. All that is required is a side panel with at least two rear mounting screws. 10mm (3/8in) ID quick disconnect shut-off valves are included with the L-bracket.

The versatility of the EHX-1050 comes from it's adjustable bracket. It is hinged for easy access to the computer. The EHX-1050 can be mounted from 3" to 5" (7-13cm) behind the computer for cable clearance. At only 16.5" (42cm) tall, even smaller ATX chassis can accommodate it. The EHX-1050 can be mounted vertically from ground level up to 10" (25.4cm) high on taller computers, and shifted 1.25" (3.2cm) left and right to remain centered behind the chassis.
