

NZL-LXG2 is a special lower-profile fitting than NZL-LXG1 at only 2cm (0.79") high.

Create a swiveling 90 degree elbow bend using any Koolance G 1/4 BSPP (parallel) thread fitting. For a basic elbow fitting, the [Koolance Coupling Adapter](#) could also be used. Or for maximum adjustment, consider placing two swiveling elbow fittings together. Nickle-plated brass. Fittings not included.
