

MB-ASR3E Water Block (ASUS Rampage III Extreme Motherboard)

The MB-ASR3E water block is designed exclusively for the ASUS Rampage III Extreme motherboard (not included). It liquid cools the northbridge chipset and other nearby components. Materials include copper with anti-corrosive nickel plating, acetal body, and an acrylic and steel top cover. G 1/4 BSPP fitting threading.

NOTE: If installing a video card into the third slot of the Rampage III Extreme, this water block requires a single-slot video card (or one which is water cooled) to be installed there. A dual-slot video card can conflict with the bottom fitting socket.

General	
Weight	1.30 lb (0.59 kg)
Wetted Materials	Nickel-Plated Copper, Nickel-Plated Brass, POM Acetal, PMMA Acrylic, Stainless Steel, EPDM, Silicone
