P/N: BKT-HX001

Radiator Mounting Bracket with Quick-Release

The Koolance BKT-HX001 is an adjustable heat exchanger mounting bracket with quick-release feature. Heavy steel construction supports heavier radiators (such as 4-fan sizes) with minimal movement. BKT-HX001 is designed for 120mm fan radiator spacing, with holes to mount to a 120mm fan grill on the computer chassis side.

A quick-release bar allows instant removal and reattachment of the radiator and bracket without tools. Thumb nuts provide spacing of 51mm/2in (fully contracted) to 101mm/4in (fully expanded) from the chassis. Mounting hardware is included.
