P/N: SEN-AP002P

Temperature Sensor, Flat, 50K Ohm (Older Version)

NOTE: This sensor will only work with Koolance products which use 50K Ohm @25°C sensors (introduced before 2011). Flat thermistor temperature sensor compatible with Koolance multi-sensor systems. Wire length = 30" (76cm).

This type of thermistor is more fragile than metal-encased plug versions. The sensor may burn out if placed in direct contact with a high heat source. The probe should also *not* be placed directly between a heat source and its liquid cooler to prevent inadequate heat transfer.

General	
Weight	0.01 lb (0.00 kg)
Max Temperature Tolerance	90°C (194°F)
