P/N: TMS-EB205

TMS-EB205 Expansion Board

The TMS-EB205 Expansion Board doubles the amount of components which TMS-205 can monitor and control. Added features include:

- 1 extra 12V DC pump
- 1 extra flow meter (Koolance INS-FM16, INS-FM17/N, or INS-FM18)
- 3 extra fans
- 5 extra temperature sensors (10K Ohm)

The TMS-EB205 Expansion Board will not function without the TMS-205 Main Board. Please see the TMS-205 product page for notes on specific hardware compatibility.

NOTE: If TMS-205 is installed into a motherboard slot, installing the TMS-EB205 Expansion Board will require an additional motherboard slot due to their combined height. Alternatively, both will fit in a 5.25" bay using the tray provided with the TMS-205 Main Board.

Components included: TMS-EB205 expansion board, mounting screws, 5 x temperature sensors, 3 x 3-pin fan wire extensions, 1 x 3-pin pump wire extension.

General	
Weight	1.00 lb (0.45 kg)
