

**VID-487 Water Block (AMD Radeon HD 4870,  
4890 Video Card)**

The Koolance VID-487 is a combined GPU and memory block for high-end water cooling of ATI Radeon HD 4870 and HD 4890 video cards in single or multi video configurations. It combines a full nickel-plated solid copper cooler which targets all primary heat-producing regions of the HD 4870 and 4890 (including the voltage regulators). An acrylic lid allows coolant visibility under the logo.

Fitting threading is standard G 1/4 BSPP. For multiple card configurations, video [connectors](#) are also available.

NOTE: This product is based on the original reference board layout. It will not fit video cards which have been changed from the original AMD or NVIDIA reference spec.

| General          |   |
